humor and aging deals with humor throughout the life span although primary attention is given to humor about and by the elderly the book contains theoretical and review material from infancy to old age and includes empirical studies of death and dying in both our own and other societies the book is divided into four parts part i considers theoretical models of humor development across the life span and discusses physiological psychological and sociological processes part ii deals with ways of considering humor and aging from different vantage points these include 1 humor about people of different ages 2 humor for people of different ages and 3 humor by people of different ages part iii addresses the grim subject of death and dying and how it lends itself to humorous treatment in our own and other societies part iv contains brief empirical reports since scientific research in humor and aging is only beginning it seems important to discuss pilot work in hopes that others will follow finally an epilogue by loeb and wood presents a compelling theoretical approach

global health a field of study research and practice defined in 2009 with precursors in international health and development is currently reckoning with itself the field has well intended goals emphasizing collaboration and dialogue between population health public health clinical care and other disciplines to address socioeconomic determinants of health and employing interdisciplinary approaches to address health inequities wherever they exist despite these lofty ideals there are concerns that the field itself has historically served to reinforce rather than deconstruct colonialism and power imbalances at this point in time the field has evolved toward a vision of a community of practice between institutions across the income spectrum hic lmic lic working in bidirectional and multidirectional ways to develop staff space systems and strategies to eliminate health disparities however with deeply rooted colonial assumptions racism elitism and other forms of bias underlying institutions and individuals initiatives operating under the auspices of global health are all too often antithetical to the pursuit itself

the organizers of the 12th international conference on multiple criteria decision making mcdm held june 19 23 1995 in hagen received the second time the opportunity to prepare an international conference on mcdm in germany the first opportunity has been the 3rd international conference on mcdm in konigswinter 1979 quite a time ellapsed since then and therefore it might be interesting to compare some indicators of the development of the international society on mcdm which has been founded in konigswinter stanley zionts has been elected first president and all 44 participants of that conference became founding members today our society has over 1200 members and its own journal mcdm world scan in hagen 1996 we had 152 participants from 34 countries it is interesting to mention that also other groups established their organization like the european working group on multiple criteria decision aid the german working group on decision theory and applications the multi objective programming and goal programming group esigma and some others it is also interesting to note that the intersection of members of all these groups and societies is not empty and there is quite a cooperation among them

this book traces the historical development of major language teaching methods in terms of theoretical principles and classroom procedures and provides a critical evaluation of each drawing from seminal
